

NAIT Changes August 2016 – Please read carefully!

- NAIT have imposed new requirement on all parties ordering new NAIT tags, this comes into force on the 25th August 2016
- NAIT now require a farmer to advise you as a retailer the **designation of the animal/tags** being ordered, this will then be registered against the tags on the NAIT database
- There are two designations for **cattle tags** being ordered: **“BEEF”** & **“DAIRY”**, most tags ordered for cattle through a retailer are “BEEF” (but not all!!)
- There are three designations for deer tags being ordered: “VENISON”, “VELVET” & “TROPHY”, most will be designated “VENISON” (there will be often two deer designation on one farm)
- Allflex have added the required features to both our ordering forms and the Web Ordering System
- This is a simple guide to show you the Web Site changes

NAIT Compliance Packs order form

Replacement Tags

Tag Colour
White

- Allows movement to sale.
- Allows movement to slaughter.
- Eliminates the need to match with the existing primary tag.
- Easiest way to NAIT comply animals which already have AHB tags.
